

If you have a need to uninstall CARCare, it's easy to do.

The steps below will remove the CARCare software, all CARCare related system components, all CARCare related registry keys / values, and all data related to CARCare.

Follow the steps below.

1. Close the **CARCare Reminder Monitor**
 - a. If you see the CARCare “CC” icon in the Windows Notification Area, right-click on the CARCare icon, choose **Shutdown...**, and answer **Yes** to the confirmation prompt.

2. Double-click on the **CCUninst.exe** program located in the **C:\Program Files (x86)\CARCare** folder on your computer. Follow the on-screen instructions. If asked whether to remove unused components, answer **Yes** to all.
3. Delete the **C:\Users\Public\CARCare** folder on your computer, which is where your CARCare database file and all CARCare related data files are stored.

Do not delete this folder unless you have confirmed that you no longer need any CARCare data and that you no longer need any of the files stored in this folder structure.

The three steps above will remove all CARCare software, all CARCare related data, and will remove all CARCare keys/values from the Registry on your computer.
